

A 3D perspective drawing of a rectangular box. On the top surface, there are four circular components, one near each corner. On the bottom surface, there are also four circular components, one near each corner. The box is shown from an isometric perspective, with the front face, the top face, and the right side face visible. The components on the top and bottom are represented by concentric circles, suggesting a cylindrical shape. The box itself is a simple rectangular prism.

An exploded view diagram of a mechanical assembly unit. The diagram shows a rectangular frame with a top plate and a bottom plate. The components are numbered 1 through 11. Component 1 is a vertical support on the right. Component 2 is a horizontal support on the right. Component 3 is a vertical support on the top right. Component 4 is a vertical support on the left. Component 5 is the top plate. Component 6 is the bottom plate. Component 7 is a circular base. Component 8 is a horizontal support on the left. Component 9 is a vertical support on the top left. Component 10 is a circular base. Component 11 is a vertical support on the bottom left.
